ARQUITECTO DESARROLLADOR PLATAFORMA WEB NET CORE

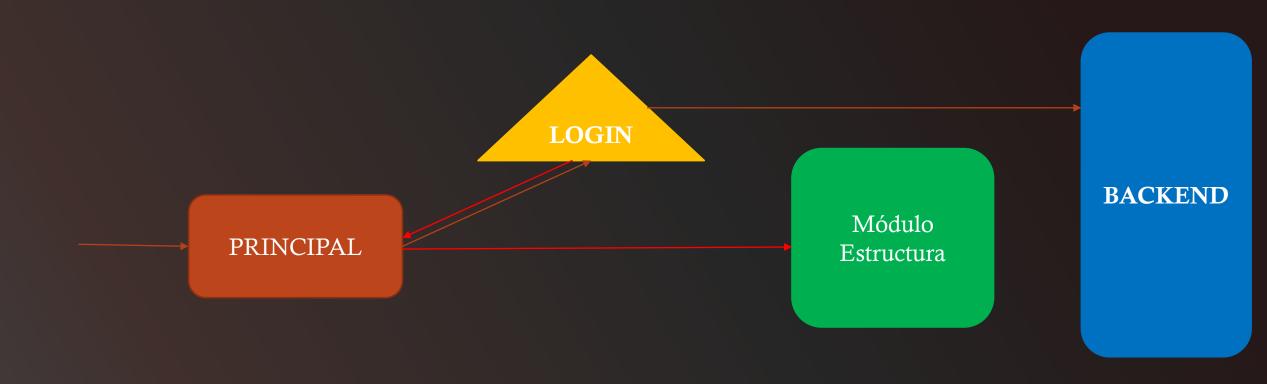

## REDIRECT A LOGIN

## **DEFINIENDO LA ARQUITECTURA WEB**

## MODIFICANDO COMPONENTES DE LOGIN

```
import { NgForm } from '@angular/forms';
import { Router, ActivatedRoute, ParamMap } from '@angular/router';
@Component(
   templateUrl: './login.component.html',
   styleUrls: ['./login.component.css']
export class LoginComponent implements OnInit {
model: Usuario = new Usuario();
errorMessage:string;
loading:boolean = false;
constructor(private router: Router) { }
ngOnInit() { }
login(){}
public redirectLogin() {
this.router.navigate(['/mestructura/estructura/']);
```
